

AFG-HV-2300-...

CAT'ARC multi-risk and high visibility switching jacket to protect against an electric arc

Description :

Application :

- Specially designed to be worn on top of the usual clothing, for short operations (eg. power-breaking operations, sectioning, installation of external meters, digging and earthworks, live working on batteries).
- Offers the perfect protection for both Live Working (low voltage) and in High Visibility category 3.
- Compliant for work carried out under the french decree SECUFER.

Features :

- High collar for a reinforced protection in the event of exposure to the electric arc.
- Adjustable bottom sleeves for a better fitting below the insulating gloves.
- A hook-and-loop band central fastening along the entire lenght: easy to open and close.
- Accessory loop on the left chest.
- A back length of 121 cm to ensure an efficient protection of the operator down to the knees.
- Pictograms of the standards clearly visible on the left sleeve.
- Standard pictograms on the left sleeve.
- Soft and comfortable fabric.
